Inga Elections.

In the elections last week
in the Inga M.D. two of the
former councillors were re-
elected while one was defeated
in the three districts. The
results are as follows—

Division 2—Kreye 90, O
B Baron 45, G Shaw 12
Division 3—Tattersall 50,
A H Schukie 30.
Division 5—Howatt 103,
Faulks 30

The Council Board now
consists of the following—E.
A Hopkins, Fred Kreye, Ed
Tattersall, R.C. Howatt, R.
Goetz and M. McKinlay.

Spence Grove Results.

In the only division con-
tested in the Spence Grove
M.D. Mr Theod Wudel won
over Eli Schmetz, former coun-
cillor by 115 votes to 43.

Very True, But—Blasphemy is he
who expects nothing for he shall
never be disappointed.—Pope

Growing old is just a slow pro-
cess of shedding enthusiasm.

people get ill.

Corns? here is relief
Dr. Scholl's
Zino-pads
Put one on—the pain is gone

For quick and lasting relief from corns,
blisters, and bunions, there's nothing
like Dr. Scholl's Zino-pads.
Healing starts immediately, while the
tender spot is protected against pres-
sure and irritation. They are thin,
adhesive, waterproof. Antiseptic heal-
ing absolutely safe!

PAUL WERNER,

LOCAL NEWS.

Wm Comisarow was a Le
due visitor on Sunday.

Mr A E Michael, returned
on Saturday from a visit with
friends at Halkirk.

Mr Hy Ulmer left Monday
night for the coast while Mrs
Ulmer and children leave to-
night.

Mr E. J. Golz returned
Monday morning from a visit
to Chicago.

John Eberhardt of Edson
was a week-end visitor in
Stony.

Mr S. G. Simmons, formerly
of the Bank of Montreal staff
here, has resigned his posi-
tion with the Bank and is leav-
ing for California.

Mr Marcon and family of
Spruce Grove have moved to
Stony and will reside in the
Russell mansion on 3d street.

The Stony Plain Town
Council meets tonight and
has some very important
matters on the docket.

With a carload of Stars
in town and plenty moonshine,
thing should appear pretty
bright.

There has been considerable
opposition in the Provincial
Legislature concerning the
proposed redistribution of
seats for the coming election,
and it is almost a certainty
that the Stony Plain consti-
tuency will remain intact, at
least, for another term.

Owing to the unfavorable
condition of the roads, it was
found necessary to postpone
the special demonstration of
Star Cars until next Satur-
day, March 13.

All those holding keys to
the radio set at Miller's store
are requested to bring them
in on Saturday, March 6th, to
see who wins the big 5-tube
Receiver.

Mr Jas Grantham was ac-
cidentally killed in Edmonton
last Thursday morning. The
deceased was well-known in
this vicinity and was married
about 3 months ago to Miss
Annie Goebel, dau. of Mr. C
Goebel of Stony Plain. The
interment took place in Ed-
monton on Monday afternoon.

Announcement and INVITATION

To All Concerned or Other-
wise, TO COME TO THE
Special Demonstration
OF

STAR CARS

In Stony Plain,
ON

Saturday, March 13.

Another Fruitless Strike

The folly of strikes and lockouts as a means of settling labor disputes is once again demonstrated in connection with the ending of the miners' strike in the anthracite coal fields of Pennsylvania. Originally the miners demanded a ten per cent. increase in wages, about \$1.00 per day, and the check-off system, the latter being the method whereby the coal companies collect dues for the union by deductions from the miners' pay. The coal operators refused to increase wages, refused the check-off, and offered periodic arbitration and a long contract.

As a result of the ensuing deadlock, 153,000 men working in 828 mines of 135 companies abstained from work for a period of 166 days, and lost wages aggregating \$1,000,000 a day. On the other hand, the coal companies lost the production of 1,000,000 tons of coal a day, and the industry and the community lost, it is estimated, one billion dollars, while the people of the United States, and to some extent in Eastern Canada, suffered loss and endured hardships because of lack of fuel. The effect on the morale of these 153,000 men in idleness, and the women and children dependent on them, cannot be estimated in dollars and cents.

The effect, these losses, what have the miners gained? The settlement arrived at provides that they go back to work at once at the old scale of wages—no increase being granted—and continue uninterrupted to August 31, 1930. After January 1, 1927, either side may, not often than once a year, propose changes in the contract, but if the two parties fail to agree after thirty days negotiation, then the decision shall rest with a board of two men. The check-off is not specifically provided for, but it is provided that "questions of co-operation and efficiency shall be referred to a conciliation board of three operators and three miners." The miners classify the check-off as "co-operation and efficiency" and expect to get a modified form of check-off.

Without any increase of wages, and not to recoup the taste for a year, the miners have little opportunity of making up the \$125,000,000 of wages lost to them through the strike. They have weakened their position in other respects. While the mining of hard coal in the anthracite fields of Pennsylvania was at a standstill, the miners and operators in the West Virginia and Kentucky fields found a market for all the coal they could mine, and excessive demand made it possible to boost prices all along the line. In many of the anthracite mine owners are also interested in these southern fields, what they lost in Pennsylvania they made up in the southern states, while the general public paid. But the miners had no means of recouping their losses.

Furthermore, these periodical strikes in Pennsylvania—there have been eight strikes since 1930 aggregating nearly 700 days, or nearly two full years of labor—have resulted in manufacturers and others turning more and more to the use of oil fuel and electric energy developed from waterpower, thus steadily and permanently decreasing the demand for coal. The effect in Canada has been to create an almost universal national demand for the development of the coal resources of the Dominion, and thereby release this country from dependence on the United States, and keep an average of one hundred millions of good Canadian dollars at home which are now annually sent to the United States for coal.

Thus it will be seen the miners have gained little. If anything, as a result of resorting to the obsolete weapon of the "strike," but, on the other hand, have lost much and are in danger of losing more.

With but few exceptions for many years past, the history of strikes in Canada, United States, Great Britain has been the same—a record of failure to achieve anything at all commensurate to the losses sustained, and, as a rule, nothing but loss to everybody concerned, the public included.

Efforts are being made the world over to prevent war as a method of settling disputes between nations. War is universally recognized and condemned as a relic of barbarism, as a blot upon our civilization, as a denial of our boasted culture and Christianity. That it entails enormous suffering and economic loss upon the victor as well as the vanquished, and in the final analysis settles nothing, is fairly generally admitted as the general experience following the Great War.

A "strike" is merely another name for war in the industrial world. It is a form of civil war, and often leads to bloodshed and the destruction of property. It entails huge economic loss, and much human suffering, and, let it be emphasized, in the final analysis settles nothing.

In the international arena, the League of Nations and the World Court it has brought into being are successfully striving to supplant war with the civilized and sane processes of consultation and arbitration. In the realm of labor and industry war, that is the strike, weapon should likewise be abolished, and conferences, consultation, arbitration substituted, and such sane and economical methods employed before a "strike" and not after, as is now almost universally the case.

CHILDREN CRY FOR

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrup, especially prepared for Infants in Arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Another Use For Helium

Mixed With Oxygen Permits Divers to Reach Greater Depths

Another use for helium, the inert, non-inflammable gas that is used for inflating the American dirigible balloons. One of the dangers of deep-sea diving is the absorption of nitrogen by the blood. Recent experiments indicate that a mixture of helium and oxygen will permit divers to descend to depths greater than have been attained, and to ascend more rapidly without danger.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, drapery, coverings, hangings—everything.

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Trylan Lodge of Masons in Gloucester, Mass., has a chapter signed by Paul Revere. The chapter's document is kept in the vault of a bank, only a copy being hung in the lodge room.

Headache and Tired Feeling Disappeared

So Says Ontario Lady After Taking Dodd's Kidney Pills

Mrs. M. E. Hall gives her experience with Dodd's Kidney Pills.

Huntsville, Ont.—(Special).—Dodd's Kidney Pills relieved my kidney trouble in very short time and I didn't take as many as was marked for a dose on the box. They made me feel better all over. I could not believe, sleep well, didn't have headache or that tired feeling. I highly prize them.

This statement comes from Mrs. M. E. Hall, a well-known and highly respected resident of this place.

Dodd's Kidney Pills strengthen the kidneys and put them in good order to do their full work of retaining the impurities out of the blood. With pure blood there is good health all over the body.

There is no reason why anyone should continue to suffer from Dodd's Kidney Pills can be obtained from druggists everywhere. The Dodd's Medicine Co., Ltd., Toronto.

New Type of Talking Machine

Voice Is Registered On a Film Instead of Disc Record

The talking machine industry may be revolutionized as a result of an invention announced in Paris, which supplants the well-known disc, which is capable of playing only a few minutes, with a celluloid film which can be made as long as anyone wants.

M. and Mme. Faucou-Johnson, sharing their laboratory together, like the famous Curies, are the inventors. The French scientific world is singing the praises of the plucky couple who worked for 11 years in the most extreme poverty and in sickness until they realized their ideal. By the new invention, it is claimed, the dialogue or musical score, as well as moving pictures, can be registered on the film.

It raises the dictaphone to a new plane of business and usefulness, since it obviates the necessity of continually changing records. It promises this discard of all types of records now used on talking machines in favor of the more compact film of any length desired.

If one be troubled with corns, he will find in Holloway's Corn Remedy an application that will entirely relieve suffering.

Chinese Celebrate Their New Year

The Chinese New Year began Saturday, Feb. 13. This is year 4889 according to the Chinese reckoning. The New Year brought a week of relaxation, festivity and exchange of courtesies.

Russia Competing For U. S. Trade

Preparing to Export Many Commodities During Next Six Months

Officials of the commissariat of agriculture announce that Russia is preparing to export to the United States during the next six months, six billion eggs, 50,000,000 pounds of butter, and 40,000,000 chickens, ducks, turkeys and wild fowl.

The United States, officials say, will also be able to absorb about seven million dollars worth of sausage casings, \$10,000,000 worth of wool for carpets, horse hair, and animal bones for sugar refining purposes.

Declaring that these commodities are now being purchased by the United States in England and Germany, they urge Russian producers to compete for this trade.

Rhone Tunnel Nearly Completed

Has Provided Work For 800 Men Daily For Fifteen Years

The Rhone tunnel which links the town of Marselles with the Rhone, is about completed. It will be officially opened this year. Started in 1911, this tunnel, 7,120 meters long, which will permit shipping of certain tonnage to travel direct between Marselles and the Berre, has an average width of eight meters, although in some portions the depth is more than thirty meters. Since 1911 some eight hundred men have been working daily, representing some 30,000,000 hours of labor.

A Prime Dressing for Wounds—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Broadcasting Heat

Anything May Become Possible in These Days of Scientific Progress

"The day is not far off," says a technician of Pittsburgh, "when we will see how centralized heating plants broadcasting heat to be utilized at far distant points in homes, plants and office buildings."

We are all prepared to believe the thing possible and certain to come. For the wonder of the radio, almost beyond anyone's dream a few years ago, puts us in the frame of mind of expecting anything of science, even the total abolishment of human scepticism.—Toronto Blade.

Minard's Liniment for Colds

Princess Mary is Never Late

Princess Mary has been learning since nursery days the punctuality like cleanliness, is almost divine. Breakfast at Goldsbrough Hall is at nine o'clock sharp, and neither she nor Viscount Lascelles is ever late.

Children's Colds

Are best treated as soon as they start. Check them early! without "coughing" or "crying." Wins low throat and chest as well as head.

VICKS VAPORUS

Yet most of the world's big jobs are held by men who didn't impress the neighbors very favorably as youngsters.

TONIC TREATMENT FOR INDIGESTION

Indigestion Comes With a Run-Down Condition—Relief Comes Through Enriching the Blood—Dr. Williams' Pink Pills Make New Blood.

There are many symptoms of indigestion such as acute pain after eating, belching, or wind, nausea, and vomiting, bloating and pains in the region of the heart, a dread of food for the misery it causes. Distilling and the use of pre-digested food, however, does not cure it, and, meanwhile, the stomach grows steadily weaker. The work of digestion depends upon the blood and nerves and the only way to get rid of indigestion is to tone up the stomach through the blood, so the work nature intended it should do. The one thorough way to do this is through the use of Dr. Williams' Pink Pills, which, by enriching the blood, strengthen the nerves and enable the stomach to do its work with ease and comfort. Neglected indigestion means prolonged misery. If you have any of the symptoms of this trouble try the tonic treatment with Dr. Williams' Pink Pills at once and you will be gratified with the results.

Among the many who have found raw health through the use of Dr. Williams' Pink Pills is Mrs. Ada Webb, R.R. No. 3, Prescott, Ont., who says: "For a long time I went through the tortures of nervous indigestion; I call it torture because no other word can describe what I endured. If my stomach was empty I retched, if I took food I vomited, did not sleep, and I was steadily growing weaker. I doctored for months but with no benefit. One day my husband said, as the treatment you have had has not helped you, why not try Dr. Williams' Pink Pills. I consented and he got me a supply. After I had been taking the pills for a while I knew they were helping me as the pills and retching grew less and I slept better. I gladly continued the use of the pills and in a few months I felt like a new woman, better than I had felt for years, and able to work for my husband and children again. After such a wonderful experience how can I do anything else but recommend Dr. Williams' Pink Pills."

If you need a blood-building tonic begin taking Dr. Williams' Pink Pills to-day. Sold by all medicine dealers or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Rents amounting to more than \$1,250,000 are annually collected by the City of London from property it owns.

Proved safe by millions and prescribed by physicians for

Colds Headache Neuralgia Lumbago
Pain Toothache Neuritis Rheumatism

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monzonville, Germany. While it is well known that Aspirin means Bayer manufacturing, to protect the public against imitations, the Tablets of Bayer Company will be stamped with their special trade mark, the "Bayer Cross."

Joint Swine Committee Holds Meeting To Consider Problems Affecting The Swine Industry

A meeting of the joint swine committee for the Dominion of Canada was held at Toronto on February 23rd and 24th. The committee, comprising Messrs. C. M. Leachman, Weston, Sask., representing the Western Canadian Livestock Union; J. Duff-Brown, Regina, Ont., representing the Eastern Canadian Livestock Union; E. N. Rodriguez, Quebec, representing the Provincial Swine Breeders; J. E. Todd, Toronto, representing the Industrial and Development Council of Canadian Meat Packers; and the secretary, L. C. McQuaid, Dominion Livestock Branch, Ottawa, in the chair, the chairmanship of A. A. MacMillan, chief of Sheep and Swine Division, Livestock Branch, Ottawa.

Problems of importance in connection with the further development of the Canadian swine industry were under consideration, and an earnest attempt is being made to provide solutions and to direct the future development of this profitable industry on a sound and profitable basis.

In view of the comparatively high prices for hogs which have prevailed throughout the past year, producers undoubtedly are endeavoring to interpret the future position. The committee adopted a report submitted by L. C. McQuaid, bacon specialist, Dominion Livestock Branch, which reviews the development of our export bacon trade and the situation pertaining to hog production in the countries of our chief competitors. This report emphasizes the importance of a continued improvement in the supply of hogs of the approved lacon type and is encouraging in that it sets forth the comparatively sound position of the Canadian producer in regard to the future.

The committee was impressed with the importance of spreading the production of hogs more evenly throughout the year, in order to supply a steady volume of fresh product to the British consumer. This it was felt, would be extremely important in view of the new order of the British ministry of health, prohibiting the use of borax comes into effect on January 1st, 1927. It was also felt that the spreading of production will work out to the economic advantage of the producer in that it will tend to maintain a more even level of prices throughout the year. This can be brought about in two ways, first, by increasing the number of sows which farrow two litters a year, and second, by having the farrowings of these sows only one litter a year distributed throughout the spring and summer months. Steps are being taken to co-operate with the experimental stations, agricultural colleges and demonstration farms in securing further data on the economic extent and limits of the farrowing season, and it is hoped that reliable experimental data and actual demonstrations in practice over a wide area will result in a more even distribution of our hog production throughout the year.

The seasonal underbarring and overbarring of hogs and its effect on our export bacon trade was another subject which received the attention of the committee. It was pointed out that the past two years furnished an outstanding example of the swing from underbarring hogs during part of 1924 and the early part of 1925 to the tendency to excessive fattening which has developed since last fall. The changing effect of such a swing is that it makes it impossible to maintain a steady supply of export bacon of the same quality from one year to the other.

The committee gave consideration to the system of advanced registration for purchased sows, which has already been before the breeders. During the coming year small sub-committees will endeavor to bring the best judgment of the pure-bred breeders to bear on this question with the object of evolving a practical plan.

In reviewing the various factors which hinder the practice of buying hogs on a graded basis, the question of weighing facilities at country points received considerable attention. It would seem that a great deal of effort in the way of review, but that in a great many instances, particularly in Western Canada, there are not well located

weighing hogs. Furthermore, no definite method is in existence which will contribute to the establishment of confidence in the accuracy and reliability of weighing at country points. The committee is agreed that proper facilities for weighing hogs at country points would do much to improve the quality of hogs produced on the initial weighing and grading of the hogs when the shipper is present is most effective by way of education. Steps are being taken to encourage the provision of suitable equipment in this regard, and in a resolution addressed to the respective provincial governments the committee recommended the enactment of provincial legislation to provide for the licensing of all operators of scales used for weighing livestock and the use of standard scale tickets, the stubs of which shall be filed with suitable authority.

In regard to the establishment of a greater degree of uniformity in the production of bacon, the committee was agreed that our breeds of bacon hogs should be developed to a uniform type. It was also recognized that the judging of hogs at our fairs and exhibitions plays an important part in this matter, and that more rapid progress would be made if all the breeds of bacon hogs were judged according to the same standard from year to year.

In connection with the purchase of hogs within the thick smooth grade on a quality basis in Western Canada, the disservices of the Saskatchewan and Winnipeg meetings held during the past year were reviewed and note was taken of the recent arrangement now in effect at the Edmonton and Calgary yards. Under this system a division is made in the thick smooth grade between hogs of improved type and quality and those of inferior type and quality, and a differential of 25c per hundred pounds is paid for the better hogs. As this system has only been in operation for a month it will require time to demonstrate its merits and to determine its efficiency and usefulness.

Asking For Advice

Whether Crows Should Be Extirpated Or Not Is Open Question.

Specialists who have all about the bayer, rested until thirteenth stocked the best fishing waters of this province with German carp.

Specialists who knew all about rabbits never rested until the Austrians attacked their enemies with the remote parents of the present population of English rabbits.

Specialists who knew all about crows knew that Ontario's first duty is to shoot on sight every crow that robs between the people of this province and a clear view of the morning, afternoon or sunset sky.

May Jack Miner, who knows all about crows, give better advice in regard to his special subject than Ontario received from the gentlemen who knew all about German carp or Australia from the counsellor who knew all about English rabbits—Toronto Telegram.

The Industrial Goat

Too Wide a Range Between Prices of Producer and Retailer

There is too wide a range between the few cents the cattle grower receives for his beef on the hoof, and the 60 cents a pound the retailer rings up on his cash register; there is too wide a range between the \$40 a month he pays his hands and the \$40 a week the same hand can earn in the dissecting room. The same is true in every line of our industry. The farmer is the agricultural and industrial goat. His labor is held of small account; his produce is made the sport of gamblers; he is left with insufficient funds to properly equip or man his plant and yet the world is shockingly dependent upon the tiller of the soil for its sustenance—Los Angeles Times.

Production of Hops

Hop production in Canada will be doubled, the British Columbia department of agriculture states, when 3,000 acres are to be purchased for this purpose, on the reclaimed area at Lake Babine, on the 22nd and 23rd of August, at a cost of \$250,000 and brought under cultivation.

Alberta's Wheat Crop

Average Yield Over Total Acreage Maintained at Eighteen Bushels.

In view of the conflicting statements which have been broadcast concerning the extent of Alberta's wheat crop of 1925, Collis G. Grant, publicity commissioner for the province has issued the following statement in accordance with the best facts obtainable.

"It is now fairly certain, from thorough returns received by the department, that the average yield of all wheat over the total acreage will be maintained at 18 bushels, which is somewhat higher than at first estimated. The total acreage is placed at 5,718,745, on which an average of 18 bushels gives a total yield of 102,935,422, or approximately 104,000,000 bushels. Allowing approximately 3,000,000 bushels for seed, this leaves a total for marketing of approximately 99,935,422 bushels."

In Interests Of Agriculture

Eastern Scientists Try Evolve Cure For Bovine Tuberculosis

Under the direction of Dr. J. T. Fitzgerald, director of the Connaught anti-toxin laboratories, Toronto, and with the help of a distinguished French doctor, the University of Toronto has commenced a series of experiments in the hope of securing a cure for bovine tuberculosis. The announcement of the step, which has been taken in the interests of agriculture, was made by Dr. H. J. Cody, chairman of the board of governors of the university, in an address to the annual dinner given by the Canadian National Exhibition to livestock breeders and exhibitors at Toronto.

Trade With United States

Canada Exported More Goods to U.S. Last Year Than Any Other Country

Canada exported more goods to the United States during the year 1925 than any other country in the world, according to a report of the U. S. department of commerce. In the matter of purchases in the United States Canada ranked second only to Great Britain. Canadian exports for the period ended a value of \$463,700,000, while imports from the United States totaled \$650,782,508.

Saskatchewan's Registered Seed

Large Shipment Has Been Forwarded To South America

A shipment went forward recently to Buenos Aires, of 60 tons of pedigree Marquis wheat and 20 tons of pedigree Banner oats, said to be the largest consignment of seed grain shipped from Canada.

The shipment was consigned by the Moose Jaw branch of the Canadian Seed Growers Association, and was bought by the Dingo & Born Grain Corporation of Buenos Aires.

Opportunities In Canada For The Farm Worker To Ultimately Achieve Independence

Alberta Honey Production

Alberta Apiarists Are Enthusiastic Over Prospects of Industry

E. Marley, of Lethbridge, was selected president of the Alberta Beekeepers' Association at the annual meeting at Lethbridge. R. G. Shurtz, of Stirling, was re-elected vice-president. H. T. Luther, Lethbridge, bee expert at the experimental farm, secretary, treasurer, and the following directors were named: F. H. Hutton, Lethbridge; A. J. Morris, Lacombe; R. H. Baird, Brooks; and D. Chalmers, South Edmonton. The beekeepers are enthusiastic over the prospects of the industry.

Forty tons of Southern Alberta honey, the nectar of the unsurpassable clover and alfalfa fields of the Lethbridge district, have been handled by one wholesale firm there. This firm paid out \$12,000 to three honey producers of the district, the Reddel, Rose and Kerr apiaries. The Reddel apiaries produced 62,000 pounds of honey alone in 1925, valued at \$9,000.

Grit Is Important

In Egg Production

Nearly Pure Calcium Carbonate Is Considered Best

Grut plays a much more important part in egg production than has hitherto been supposed, according to Dr. Knapp, of North Carolina State College. Hens will not eat granite grit if they can get bright, hard limestone. The latter, it was found, was hard enough to do the grinding work in the gizzard and gave off a supply of calcium carbonate to supplement the mineral content of the feed. The egg shell consists of 91.4 per cent pure calcium carbonate, and when the fatter is lacking in the hen's food, egg production is retarded. The best grit is nearly pure calcium carbonate. Several grits on the market contain large percentages of manganese causing kidney disease and diarrhoea. Other grits contain acid-forming materials, rendering the reaction of the blood on the acid side.

Alberta Fish Industry

One hundred and fifty thousand pounds of whitefish were shipped from Calling Lake, Alberta, in the present season. Most of this product went to Chicago, for distribution from there. Previous years have seen this shipment salted before shipping.

The Girl? "Oh, don't come people get off on their own a car?" The Man: "Well, some certainly do get a habit of running other people down."

Billiard Champ on Tour

Claude Walker, the famous English billiard player, former world champion, arrived in Canada on the Canadian Pacific liner Montserrat recently. He is on his way to China and from there he will go to India for a trip. Traveling all the way across Canada on Canadian Pacific lines, Mr. Walker will tour for China on the C.P.S.S. Empress of Asia.

Looking forward to spring, it is already appropriate to draw attention once again to the opportunity existing in Canada for the achievement of agricultural independence by way of farm help. Many signs would go to indicate that this opportunity is but inadequately recognized. In the early months of the year the Canadian Pacific Railway conducts a survey into the requirements of farmers in territory along its lines, and thousands of farm labor vacancies disclose themselves, the great majority being for all-the-year-round employment. The demand for this help covers many European countries in scope, but every year the wants of many of the applying farmers go unsatisfied. Yet, undoubtedly, farm labor in Canada is one of the widest channels leading to a future independent estate today.

The farm helper in Canada today is the farm owner and independent agriculturalist of tomorrow. It is the acquisition of a new and involved profession in which the student is paid during his years of apprenticeship. It is pretty safe to say that the greater number of farmers in Western Canada today started their agricultural careers as farm helpers, and others would find the explanation of their difficulties and also coming success in a lack of this preliminary training. Authorities are reiterating more forcibly every day that a course of training is necessary for farm management in Western Canada, and the general demand for farm helpers puts this tuition within the possibility of most healthy individuals.

Farm labor has not an altogether nice sound in certain circles of European life, but conditions, it must be realized, are very different in Canada. The "gentleman farmer" does not exist in the Dominion. Every farmer is a worker and there is no more dignified calling than that of the tiller of the soil. Men of every class and condition, profession and calling, follow it, and extract the utmost satisfaction from their toil. Members of the European aristocracy who come to Western Canada to be workers on their own farms are increasing every year.

Lord Rodney, for example, who since 1912, has become a successful Alberta farmer, appreciated the necessity of this preliminary practical training before undertaking the operation and management of his own farm, and placed himself as an ordinary worker under an experienced farmer in order to gain this experience. So keenly is he convinced that such a course is indispensable to the inexperienced young man from Europe that he has lent his own experience and training to the benefit of others through teaching young men at his farm in Northern Alberta. His pupils now include members of some of the first families of Europe, who do not find farm labor degrading but, on the contrary, have a high appreciation of its dignity.

There is no doubt that many young men unemployed or dissatisfied with prospects would, could the opportunity farm labor offer, of securing a farm of their own in a few years and achieving an entire independence, be driven home to them, take advantage of the scheme. No matter what the standing of the aspirant, farm training in the methods of Canada is necessary for graduation to farm management, and the farm labor scheme offers the chance of earning while learning.

Butter Production In Manitoba

Has Increased Over Million Pounds In Last Two Years

Exports from Manitoba of 215 carloads of creamery butter, as against an import of 20 carloads in 1914, is the record set by the dairymen of the province during 1925, according to the annual report of the provincial dairy commission. Last year Manitoba produced 15,665,812 pounds of butter, an increase of 1,000,000 pounds over 1924. It is estimated that 1,000,000 pounds were shipped to the United States from Southern Manitoba alone. The total export from the province was 7,666,000 pounds, valued at \$2,416,288, the bulk of it going direct to Great Britain.

The first quarter was the thirteenth of plants.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Doctor:—Since I've started to attend you, you're not the same man. Patient:—Good, I hope you will present your bill to the other fellow.

Mrs. A. McDonald

Britain Discards Helicopter

Will Concentrate On Autogiro Type Which Is Much Simpler

The Brennan helicopter experiments, on which \$250,000 has been expended to date, will be discarded by the air ministry in favor of concentration on the "autogiro" autogiro. It is understood. The ministry is credited with the intention of constructing four or five machines embodying the principles of the Spanish "Windmill" plane, which was hailed by Sir William Branker, Alice Vice-Marshal when it was tried out at Farnborough as "the greatest aeronautical invention since the Wrights' new."

Experiments with the helicopter have been carried out in the closest secrecy for the last five years, but air experts are now said to have come to the conclusion that the autogiro type achieves all that the perfected helicopter would have been able to do, while its principles are much simpler.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most houses, because of its usefulness in preventing many small ailments that constantly arise. Sold everywhere in 35 cent bottles.

Boudoir or Breakfast Coat

Nothing more fascinating among the fashions has emanated from Paris this season than this tailored breakfast coat for leisure hours. It possesses all the loveliness and chic with which the smart woman of today loves to surround herself at all times. Heavy crepe de chine develops this model with padded trimming around the edges, and having a side fastening. Wide waist corsetry or quilted suits are also suitable and practical materials. The diagram pictures the simple design of No. 1225, which is in four sizes only: 36, 40, 44 and 48 inches bust. Size 36 is suitable for 34 or 36 bust; size 40 for 38 bust; size 44 for 42 or 44 bust; and size 48 for 46 or 48 bust. Size 40 bust requires 1 1/2 yards 36 or 40 inches material. Price 28 cents. Every woman's desire is to achieve that smart, different appearance which draws favorable comment from the covetous public. The design illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

Salesman For Face Cream

Learn a Lesson

New York City. Mr. H. B. Meane writes:—"I was a salesman of creams for healing pimples, blemishes, etc., but when my face broke out with blotches, pimples and blackheads, I tried one salve after another with no results. I found it impossible to sell skin creams as a baldheaded man finds selling hair tonic. Finally I decided I would have to get at the cause—constipation. I was amazed to find that within a few days after taking Carter's Little Liver Pills, my took on a new healthful look." Drugists .25 & 75c red packages.

ON THE AIR

What Is Doing in the World of Radio

G. B. Shaw says radio is doing service to theatre by training artists to perform without applause.

Reception of a radio programme from Johannesburg, South Africa, on a three-day trip at London, Ohio, recently has been verified.

The aural borsals is being blamed by experts for unsatisfactory radio reception. There are now more reasons why the radio set will not work than if it should—Hamilton Spectator.

An ordinary street light in an English town has the peculiar property of acting as a radio and every day it broadcasts radio programmes. The postman stops on his rounds to listen to a programme.

A college which will broadcast all of its lectures and instructions has been inaugurated at Vienna, Austria. The daily courses will start at 10 p.m. and will last approximately two hours.

Rough usage harms many radio tubes and causes the owner to purchase a new set before he should need them. Handling tubes, taking them out of the sockets, and such often causes damage to them.

Direct wireless telephonic communication with Australia, a distance of 12,000 miles, has been established by Frank Neill, an amateur of Whitehead, near Belfast, Ireland. The test lasted 15 minutes and the voice of a Melbourne citizen named Howden could be distinctly heard. The wave length used was 35 metres.

One of the most effective vermicides on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach where directions are followed and Belfast, Ireland. The test lasted 15 minutes and the voice of a Melbourne citizen named Howden could be distinctly heard. The wave length used was 35 metres.

First Recorded Eclipse

Eclipses were predicted by an Arabian, named Calippus, in the year 336 B.C. The first eclipse recorded in history happened on March 19, 721 B.C., according to Ptolemy. It was an eclipse of the moon, and was observed with accuracy at Babylon in Mesopotamia.

Still Enjoying Life at 84

Thanks To That Wonderful Remedy

Mrs. F. H. Miller, 1843-11th Ave. East, Vancouver, B.C., writes:—"Five years ago my husband suffered terribly with severe attacks of palpitation of the heart and smothering spells and two doctors stated that he could not possibly live six months."

A friend recommended Milburn's H. and N. Pills, with the result that my husband is still enjoying life at the age of 84 years.

He has improved so wonderfully that he can now climb the stairs without having those awful pains in his heart."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

MARCH 7

JESUS WASHES HIS DISCIPLES' FEET

Golden Text: The Son of man came not to be ministered unto, but to minister, and to give His life a ransom for many. Matthew 20:28.

Lesson: John 13:1-17.

Devotional Reading: Psalm 138:1-6.

Explanations and Comments

Supreme Love, verse 1.—To rightly understand the scene in our lesson, we must know about the practice of foot-washing in Palestine. There were no pavements, no stockings, nor socks were worn, and the shoes, or sandals, which were little more than pieces of leather, were removed on entering a house and left at the door. The dust of the streets made the feet burn, and their cleansing with cooling water was refreshing as well as useful. Tassin and over were kept ready for this purpose. The washing was performed by servants, or by the sons of the household, as an affectionate duty, and was considered one of the humblest of services. At the time of our lesson text, the disciples, as Luke tells us, had just had a dispute among themselves as to which one of them should be recognized as the chief disciple. Possibly they had disputed about their positions at the table where they were to partake of the Paschal lamb with their Master, or they may have wondered about the question as to who should perform the menial task of washing the feet of the others. The spirit of pride and rivalry and self-assertion with life among them. Jesus knew this. But He loved them. "Knowing that His hour was come when He should depart out of this world unto the Father," Jesus told us, "Jesus, having loved His own that were in the world, loved them unto the end." Or, "He loved them to the uttermost," as the margin of our Bible translates the Greek words.

Minard's Liniment for sore throat

You can train almost any dog to stay at home, but not a jarhound.

HORSEMEN!

There is no better friend in the stable than Minard's Sorefoot for sprains, swelling, stiffness.

Explore North Pole Region

Stefansson Is Appointed As Advisor Of the Wade Polar Flight

Vilhjarm Stefansson, the Arctic explorer and native Maniaban, has accepted the post of technical advisor to next summer's aeroplane polar expedition, under the leadership of Lieut. Leigh Wade, one of the army round-the-world fliers.

Robert Anderson Pope, the expedition's organizer, announced that the party would remain in the Arctic three years if it discovers the supposed continent there, which is its goal.

If you suffer from headaches, backaches or any other symptom of Kidney trouble, take Gin Pills. They will cleanse the kidneys and promote a sound health.

THE CROW'S NEST RATE PROBLEMS AGAIN TO FORE

Ottawa.—The Crow's Nest Pass rate problem is again in the hands of the board of railway commissioners. The order issued last September extending these rates to westbound grain and flour resulted in three separate appeals to the board for further interpretation. The first of these was settled last month, when by an equal division among the commissioners the September order was confirmed in force. The board closed a week's sitting on the other two appeals, in both of which judgment has been reserved.

These two last cases were parts of an effort by the provinces of British Columbia, Alberta and Saskatchewan to get a further reduction in the rates as put in force by the railways under the September order. These provinces claimed, first, that the eastbound rates on grain and flour are above the Crow's Nest Pass rate, and secondly, that the act passed last June. They asked that these eastbound rates be reduced in accordance with this claim, and then used as a basis for making westbound rates. On this matter, the board reserved judgment.

The second effort of the three provinces to get the westbound rates reduced was an application for a direction to the Canadian Pacific Railway to discontinue the differential of 10 mills, used in making its rates west of Calgary. The rates, in effect, were made by the railways on the basis of the Canadian National mileage from Edmonton to Vancouver, which is 124 miles greater than that from Calgary to Vancouver. The three westernmost provinces claimed that the railways had no right to use this differential or constructive mileage, and asked that it be discontinued. On this issue the board reserved judgment.

Scales Mountain In Blinding Snowstorm

Highest Peak in South Africa Conquered by Cape Town Climber

Cape Town.—Kilimanjaro, the highest mountain in Africa, has been conquered in a blinding snowstorm, after the second attempt within a month, by G. Londe, the noted Cape Town climber.

"Mr. Londe" said that he set out with two natives at the beginning of November. He climbed nearly 20,000 feet in four days. He slept one place in a cave of the Kilimanjaro wilderness by a jagged rock of twisted lava.

He pointed out a mistake which had been made by previous climbers. They imagined that the crater was the top of the mountain, but that is not so. The real top lies in the foot above. He discovered the record of two Germans who, in 1914, reached the highest point.

It is an American cloth-covered exercise book containing two verses of poetry. "There follows the names of the two climbers, Carl von Sella and Walter von Ruchteschell, dated February 13, 1914."

Display Of Wealth

Splendor Marks Great Coronation Fete Of Indian Ruler

Jammu, Kashmir.—Rarely has India, with all the riches of its princes, witnessed such splendor as was displayed when the Maharajah of Jammu and Kashmir, Sir Hari Singh, entertained 150 guests at a state banquet in honor of the ruling prince and chiefs of his native Indian states who are here from all parts of the country for his coronation.

The prince, who, served on gold plates and the members of their staffs on solid silver. The native rulers were attired in their priceless state robes, and the great ornate banquet hall of the royal residence blazed with light cast from jewels whose value was estimated at a total of several million pounds.

Heavy Catch Sinks Vessel

Copenhagen.—A Norwegian fishing vessel, which left Yagsoy one morning, and last seen at four the time today, is believed to have sunk with all five hands, under the weight of an exceptionally heavy catch.

W. N. U. 1618

Progress Is Made On Alberta Highways

Government Ready To Proceed With Farm Loan Measure

Edmonton.—The debate on the address from the throne has given several of the ministers an opportunity to explain the work of their departments.

Hon. Alex. Ross, minister of public works, explained the progress that has been made in the construction of main highways throughout the province. 600 miles of main highways have been rebuilt according to the specification necessary to earn the Dominion Government grant of forty per cent. of the cost and 240 miles have been gravelled. The department expects this year to do more work than ever. By the end of the summer they expect that a main highway from Athabasca on the north to the international boundary on the south will have been completed, and also a highway from Edmonton to Peace River. A motor road will also be completed from Edmonton to Jasper National Park. At present the road is twenty-five miles from Jasper, and should reach Jasper this summer. The progress made in road construction had attracted many tourists this summer, 22,000 having registered at the east gate of Banff National Park during 1925.

Hon. R. C. Reid, provincial treasurer, informed the house that the municipal districts throughout the province were in very good financial shape. During the year only forty had borrowed from the banks, and at the end of the year only 25 were owing the banks anything.

A Liberal member had charged that the hotels of the province were cluttered with government inspectors, but it was the cause, said Mr. Reid, during the Liberal regime they must have been parked outside, for at the present time there were only 105, as compared with 128 in 1921. Salaries were down \$59,200, and travelling expenses \$128,000.

Suspend Proposed Increase In Rates

Plan to Raise Rates on Stockers and Feeders by Fifty Per Cent.

Ottawa.—Suspension of the proposed fifty per cent. increase rate on stockers and feeders in the western provinces, was ordered by the board of railway commissioners.

The increase, which it was proposed by the railway to put into effect on March 1, would apply to rates on stockers and feeders from primary markets such as Winnipeg, Moose Jaw, Calgary, and Edmonton to stations in Manitoba, Saskatchewan and Alberta. It is probable that the matter will be considered at the time of the meeting in Regina on the general rates inquiry.

No date for this sitting has been decided upon, but it will probably take place within the next two months. The application for suspension was made by W. H. McEwen, counsel for the province of Saskatchewan.

Refused Landing At Chinese Port
Hong Kong, China.—Two American women missionaries of the American Protestant-Holiness Alliance and a British woman missionary were not allowed to land at Peking, because they came from Hong Kong. The officials' refusal to permit them ashore is part of the strike and boycott movement in the south which has been intensified in the past few days.

Loan Quickly Bought Up
New York.—Over subscription of the Canadian Government's \$40,000,000 ten-year bond flotation in the United States has been announced by the financial syndicate which underwrote the issue.

Book for the loan, which constitutes the first major financing by the Dominion Government since last September, were open for two hours only.

Oil Monopoly In Turkey
London.—The Standard Oil Company has obtained an oil monopoly in Turkey, according to Constantinople newspapers.

The Turkish Government is said to have agreed to purchase all its oil supplies from Standard Oil at Constantinople, Smyrna and Samsun.

Opposed To Crime News
Rome.—Indications that the Vatican will take a stand against crime news in the daily papers. In the same way that it has opposed immorality in dress, are contained in the *Avvisatore Romano*, official organ of the Vatican.

SOME MANITOBA CABINET CHANGES ARE IN PROSPECT

Winnipeg.—Many changes in the cabinet of Hon. John Bracken, premier of Manitoba, are pending, according to reports in legislative circles.

It is stated that a complete reorganization of the cabinet will be undertaken at the close of the present session, including a general shifting of the positions of several of the ministers. Since the resignation of Hon. P. M. Black as provincial treasurer, Premier Bracken has held the portfolio, in addition to his office as premier and president of the executive council. It is now reported that Hon. W. R. Clubb, minister of public works, will assume control of the treasury department.

Other cabinet ministers would be shifted to new departments, and one new minister appointed. I. B. Griffiths, member for Russell, is mentioned as a possible appointee.

Hon. B. W. Crute, attorney-general, it also is reported, has definitely decided not to be a candidate at the provincial election, and should the government be successful at the polls, R. M. Matheson, K.C., Brandon, is mentioned as Mr. Crute's successor. Mr. Bracken will make an appeal to the electors either during the present summer or in 1927.

Will Discuss Peace On Pacific

Canada and United States Invited to Meeting in Honolulu

Honolulu.—The Australian Labor party has issued a call for a meeting in Honolulu in November for all Pacific nations, including Canada and the United States, with a view of arriving at a better understanding in respect to the future peace in the Pacific.

This information was contained in a message from D. L. McEwen, secretary of the Labor party, to A. H. Ford, director of the Pan-Pacific Union, here. More than 100 delegates, including representatives of the Soviet, are expected. McNamara said.

He added it was intended to bring together representatives of Labor and other organizations from countries bordering on the Pacific.

Letters By Sleigh

Cappercleuch, Scotland.—Owing to the roads being blocked by snow the mails to this town are being conveyed by a horse-drawn sleigh over the field, and in other quarters goods are being conveyed by men on horseback. Several areas on the Scottish borders have been cut off by snow, and sheep farmers have suffered serious losses.

Manitoba Debate Brought to Close

Winnipeg.—The debate on the address in reply to the speech from the throne came to an unexpected end in the Manitoba Legislature after 23 days of debate. Quietly and without ceremony the house passed the customary motion that the speech be engrossed and presented to the lieutenant-governor.

Honored by Indian Tribe

Here is a photograph of Robert Randolph Bruce, new Lieutenant-Governor of the province of British Columbia, being appointed as a chief of the Stony Indians. The governor was given a puff at the Pipe of Peace and seemed to enjoy it.

Asking Explanation Of Alleged Bombardment

British Ambassador Must Get Report From U. S. Government

London.—Sir Esmé Howard, British ambassador at Washington, will be asked to make inquiries of the United States Government and send a report regarding the alleged bombardment of the Canadian schooner *Eastwood* by the United States coastguard cutter *Seneca* off the New Jersey coast recently.

It was stated in the House of Commons by Sir Austen Chamberlain, foreign secretary, who had been asked about the circumstances of the case and whether he intended to take action to ensure respect for British merchant shipping.

Sir Austen said he had no information except what had appeared in the press. He added that he was unable to say what trade the schooner was engaged in, but the press accounts said she was engaged in an attempt at running.

Aviator Killed In Paris

Plane Caught In Wireless Apparatus In Arch of Eiffel Tower

Paris.—An attempt to fly through the opening of the Eiffel Tower proved fatal.

The aeroplane, caught in wireless apparatus, crashed in flames and the aviator burned to death.

The flier, Lieut. Leon Collot, had passed through the arch when he struck the radio wires. He made a desperate attempt to bring the machine under control, but it fell and burst into flames.

Firemen were quickly on the scene, but were unable to save the aviator.

Lieut. Collot's brother witnessed the accident. He said the lieutenant attempted the feat after a weaker friend.

Prince Has Narrow Escape

Had to Duck to Avoid Plunging Horses At Islington Show

London.—The Prince of Wales had a dangerous experience at a Shire horse show at Islington when a mare in the ring near him began to kick and set several horses rearing and plunging. There was general commotion about the Prince, but no one was injured.

Just before this he had been compelled to duck and jump aside to avoid a horse which had suddenly swerved in his direction.

Not having had enough of horses for the day, the Prince went hunting in the afternoon, this being the second time he has followed the hounds since the recent accident in which he suffered a broken collar bone.

Hop To Resume Debt Parleys

London.—Winston Churchill, chancellor of the exchequer, stated in the House of Commons that M. Doumer, French minister of finance, expressed hope that he would be able to come to London soon for the resumption of debt negotiations.

FEDERAL RURAL CREDIT PLAN IS AN URGENT NEED

Regina.—The operation of a federal long-term rural credit plan with provisions for the establishment ultimately of co-operative credit societies such as exist in Ireland, Germany, Italy and other European countries, was approved by the Canadian Council of Agriculture at its annual meeting here.

The council referred back to the various organizations the question of making Armistice Day a separate holiday to Thanksgiving Day and left to the association to deal with themselves the question of liens prior to first mortgages. Resolutions asking for the reorganization of the board of rural commissioners, for more time by distribution of reports of experimental farms, for the elimination of exchange and the cashing of all cheques at par and favoring the conscription of wealth during war time were among the more important measures adopted.

Chief interest, however, centred around the topic of rural credits, more especially in view of the fact of the announcement of the Dominion Government in the speech from the throne of its intention to provide during the present session of parliament to establish a system of long-term loans to farmers.

The progress of the proposition ultimately adopted set forth the belief of the council that "the ultimate solution of the problem of rural credit will be found in the development of co-operative credit societies controlled and operated by the farmers, though, it also recognized that co-operations in many parts of Canada are not yet favorable for the development of such societies on a large scale."

To Meet Competition

Americans Cut Prices As Alberta Coal Goes On Sale In Ontario

Toronto.—Reductions in price of American anthracite and domestic coke were made in Toronto, coincident with the commencement of sale by the city authorities of the first part of its thousand-ton shipment of Alberta coal.

Coke was reduced two dollars a ton and anthracite one dollar a ton. Property Commissioner Chisholm said that it was obvious the city's Alberta coal competition had forced down prices on coke and other fuels here.

Manitoba To Return Money

Winnipeg.—Providing for returning the money collected under the Manitoba Grain Futures Act, will be made in a bill to be introduced during the present session of the Provincial Legislature, by Premier John Bracken. The act was recently declared ultra vires of the province by a decision of the judicial committee of the privy council, following joint action by Alberta and Saskatchewan.

High Cost of Education

Winnipeg.—As an overwhelming majority delegates attending the annual convention of the Manitoba Teachers' Federation, declared against increasing consolidated school rates in the province. Referring to charges of high cost of education, Dr. Shortreed maintained that more money was spent on liquor, tobacco and other unnecessary luxuries than on education, without arousing a murmur of protest.

Trans-Canada Starts May 15

Moose Jaw.—The Trans-Canada Limited, the fastest transcontinental train on the American continent, which is operated every year by the Canadian Pacific Railway Company from Montreal to Vancouver, will be inaugurated on Sunday, May 16, starting from Vancouver, Toronto and Montreal. The trains this year will be operated on practically the same schedule as in the past year.

Will Test New Helicopter

London.—Four European countries are hastening to test the Clero helicopter, which its inventor claims will revolutionize aeroplane construction. Five Chinese villages are under construction in England with the inventor supervising the work; the Spanish Government is building two of 300 horsepower each; and France and Italy each are negotiating for the construction of five.

Ford Introduces National Payment Plan

For twenty-one years the Ford Motor Company of Canada, Limited, has pioneered in the field of motor transportation, doing everything possible to make high quality cars easy to buy and economical to own, in order that the greatest number of people may enjoy the benefits and advantages of owning a car.

In line with this policy, a new and unique time payment plan has been inaugurated which makes it possible for more people to own Ford cars.

This is called the National Time

Payment Plan because the payments are the same anywhere from Halifax to Vancouver.

Through this plan you know definitely in advance, the amount of the down payment and the installments required to buy the car you want.

You pay only the advertised amount—no more. All Ford models are now obtainable on this plan from your local authorized Ford dealer in conjunction with Traders Finance Corporation, Limited.

NATIONAL TIME PLAN PAYMENTS

Payments throughout Canada are standard. Down payments do not vary regardless of tax, license, insurance, freight and delivery charges

Runabout	-	\$175 down and \$35 a month
Touring	-	200 " " 35 "
Coupe	-	250 " " 40 "
Tudor	-	275 " " 40 "
Fordor	-	300 " " 45 "

A phone call to your local dealer will bring you complete information—without obligation

WANTED—A Contractor to erect a frame house and barn. Apply Ph. Litsenberger, Stony Plain. 87

Legends of the St. Lawrence River in Quebec

GOBLINS OF THE ST. LAWRENCE

LOUP-GAROU

Folk tales and legends still cling to the shores of the St. Lawrence, that first highway into the unknown continent of North America. Legends in which are mingled bits of Indian superstition, French customs and religious beliefs. In the time of the early explorers, those brave men who dreamed dreams which led them on and over the bright waters, past dark islands, purple hills and shining cliffs, until they settled in Canada, these legends were revered. Now, however, while large Canadian Pacific steamships crowded with tourists pay up and down the St. Lawrence, the legends are no longer regarded except as quaint fairy tales with somewhat of a religious flavour not to be discarded or ridiculed, but to be enjoyed as reminiscent of the olden days when saints and demons assumed mortal forms.

Katherine Hale, in an artistic little book issued by the Canadian Pacific Railway recently, aptly depicts many of these stories. One of the most familiar of these French Canadian legends is that of Loup-Garou, evidently derived from the German

PIERRE HENRI NOUVEL WHO VISITED QUEBEC IN 1665

were wolf or the Irish banshee. Loup-Garou typifies the French Canadian's reverence for things spiritual and his

belief in supernatural intervention. Joachim Crete, a miller at Beauséjour was not really a bad man, but he did deer at church collections and failed to try to convert his hired man merely because he was such a good partner at checkers. On Christmas night they played, instead of going to church. They even, in a mood of defiance, set the mill going, as if it were an ordinary night. Suddenly crack! and the mill stopped working. Then the lantern went out. And the two men were left in trembling darkness! After that the hired man tumbled down stairs, and the miller began to drink fast and furiously! Presently he heard a deep moaning, and turned to see a huge dog about to attack him. Then the miller knew it was Loup-Garou, and he fell on his knees praying for forgiveness. But he lunged at the dog with a reaping hook, and wounded him. That was the way of the hired man, for according to the legend, if you have been turned into the form of a wolf or dog because of evil deeds, only a bloody wound can restore you. Loup-Garou is one of many such legends.

National Aspect of Problems of Canadian Farmers

President of Canadian Council of Agriculture, at Annual Meeting in Regina, Reviews Work and Organization of Council and
Answers Recent Attacks.

In opening the annual meeting of the Canadian Council of Agriculture at Regina on February 23rd, the President, W. A. Amos, who is also President of the United Farmers of Ontario, briefly reviewed the work and organization of the Council, and vigorously repelled some recent attacks made upon it.

"The Council," said Mr. Amos, "has performed a great service for the farmers in Canada. Financially it has saved or secured for them in the price received for their grain and other products in transportation charges, and in other ways, hundreds of millions of dollars. Educationally it has stimulated their thought and provided them with material for study which has enabled them to become better farmers, better neighbors, and better citizens. Although not a political organization it gave in 1921 a lead which resulted in agriculture for the first time securing anything like adequate representation in the Canadian Parliament, and in introducing higher ideals and higher standards into the public life of the country. In a legislative way it has been instrumental in securing the enactment of such measures as will ameliorate social and economic injustices, and will make for a better citizenship. Its record of achievement, therefore, speaks for itself and I would like to ask those who have persistently criticized the Council and its membership what they have accomplished which will in any measure compare with it."

"The necessity for a farmers' organization, such as the Canadian Council of Agriculture, is constantly being demonstrated. Most of the larger problems which confront the agricultural industry, and whose solution is necessary to agricultural prosperity, are of a national, or at least an inter-provincial character. Transportation questions, including freight, express, lake and ocean rates, customs tariffs and other forms of federal taxation, the banking, currency and financial systems of the country, the regulation of the grain trade, of the livestock industry, and of other branches of agriculture, the commercial relations of Canada with other countries involving markets for agricultural products, federal legislation, government administration generally. In all these things the interests of the farmers in every province of Canada are usually found to be identical."

"The membership at the present time consists of the United Farmers of Ontario, the United Farmers of Manitoba, the Saskatchewan Growers' Association, the Grain Growers' Guide, the United Farmers of Alberta, Saskatchewan Co-operative Elevator Company, the United Grain Growers and the United Farmers of Ontario Co-operative Company. At present of the Council each of the companies is entitled to four representatives consisting of its executive or their appointees. In addition, the provincial associations are each entitled to five representatives one of whom must be a woman. The

constitution also provides that the women representatives in attendance at any meetings of the Council may meet separately to discuss matters in which women are particularly interested, and that when no meeting they shall form the Women's Section of the Council."

Mr. Amos pointed out that the Council has no jurisdiction over the bodies in membership, each of which retains complete control over its own policies and activities, and it is in reality a confederation of the representatives of the affiliated bodies.

"The Council acts only by unanimous consent, and when it does take action on any public question, it speaks for all the organizations affiliated in its membership and not merely for a majority vote in Council meeting."

"This explanation of the procedure in the Canadian Council of Agriculture," said Mr. Amos, "should be sufficient answer to the statements that I understand have been widely circulated by certain persons that the Council is dominated by the farmers' companies, or by a few large ones, or by the United Grain Growers and the Saskatchewan Co-operative Elevator Company. If by majority vote it did prevail, those companies could not dominate the Council because they between them are only entitled to eight representatives at the Council meeting, compared with twenty-five from the provincial associations. During eight years in which I have been in attendance at the meetings of the Council, there has never been an instance where the farmers' companies or any one of them have caused the defeat of any project supported by the provincial associations. During my experience there have been only two occasions where the representatives of a single organization have prevailed, the Council taking action or declaring its policy and in each of these instances it was a provincial association which entered the protest."

"The prevailing opinion," said Mr. Amos, "is that our Canadian system of organization, of which the Canadian Council of Agriculture is the co-ordinating body, surpasses all others and has accomplished vastly more for agriculture."

At the International Congress on Co-operation held at Philadelphia last year, nothing so great in scope and results seemed to have been accomplished in any other country. As recently as February 17th of this year the press of the United States would praise the work of the Wheat Pools and the superiority of Canadian Pools both in their organization and in the personnel of their representatives, and go on to say: "The value of the work done by the farm organizations in Canada was never more apparent."

Mr. Amos concluded his address with the words: "I would please those who are not in agreement with organized agriculture more than to see our ranks divided. Only with a national outlook and united action are we going to achieve the results for which we are striving."

Stony Plain and District.

Mr. M. Comisarow of Leduc was a Stony visitor yesterday.

T. Tyrkalo left on a visit to friends in Manitoba.

Mike Ducholke is moving out to his new farm at Spruce Grove this week.

Muskral Season opened on Monday. North of the Saskatchewan River, and will remain open until the end of April. Trapper's Licenses are for sale at the Smi Office.

A short Agriculture course under the Dept. of Agriculture will be held at Stony Plain on Friday and Saturday of next week.

A goodly crowd turned out to see the movie picture in Stony on Monday evening and all appreciated the extra long program. The next show will be shown on Tuesday, March 9th. "Tarsan of the Apes."

Masquerade Dance by the Girls' Club in Ducholke's hall on Friday, March 19th.

Pitzler Bros are holding an Auction Sale of 15 head of horses at the local livery barn on Saturday, March 6, 1 p.m.

Be sure and have a 1926 License plate on your car as final notice has been given by the Dept to that effect, dated March 1st.

The roads at the present are in a rather muddy condition, unfit for any kind of travel, but if the weather keeps as it has been lately in a few days the main highways will assume a summer like appearance.

A Meeting was held in the Town hall Tuesday afternoon in the interest of The Live Stock Pool and with the purpose of organizing a local Shipping Association for Stony Plain district. W. E. Stevens, Secretary of the Live Stock Pool was present and several plans were discussed with the resulting certainty of establishing Pool shipments from this district.

- 9—Movie Show in Stony.
- 19—Masquerade dance in Stony.

SPORTING NOTES.

It appears that hockey is all off for the season, as the local rink (can't trust of as much ice as a chicken can of teeth).

The final big hockey game bill for Stony on Saturday afternoon last with the Marshall Wells team of Edmonton, had to be cancelled due to the poor condition of the ice. It looking more like a bona fide swimming pond than hockey rink.

The ice in the ending rink however, is holding its shape, and the local players are working overtime in getting all out of it they can before the break-up.

News Briefs.

It is stated by authority, that this winter has been the mildest ever experienced in the North country for 125 years, which is as far back as is recorded.

Captain Raold Anundsen, world famous explorer, was an Edmonton visitor this week.

The number of homestead entries in the Edmonton land district for the first half of February totalled 63, 21 over that of February last year.

A branch line of the E.D. and B.C. Ry. north-west of Edmonton is to be started the coming season, providing the legislature approves. The line is to run from a point on the E.D. and B.C. near Westlock towards Fort Assiniboine and 25 miles will be built this year.

5,250,703 admissions was the record of Alberta theatres for 1923 or an average of approximately 100,000 a week. The govt realized \$193,331.14 in amusement taxes from that source.

Johnny Miller reports the following Ford sales and deliveries of this week—Olaf Olson, J. J. Hellum and John Clements of Duffield; Mr. Pinchbeck, Spruce Grove and J. Schmitz of Stony Plain; all Touring Cars, while Mr. Cyrus Winmer purchased a Tudor Sedan. Johnny says that the New Ford Models are sure in demand and that there must be a reason—Purchasers realize Value for Money.

Here and There

Canada has officially invited the British Dominions and colonies and all foreign powers to attend the world's poultry congress at Ottawa, which is to be held from July 27 to August 4, 1924. Three thousand delegates are expected to attend.

Canadian construction contracts for the month of January totalled \$12,568,000 as compared with \$8,384,700 in January 1925. This record for January indicates that winter construction is rapidly increasing in favor.

Mardi Gras celebrations at Ottawa started off along the lines they have made the Ancient Capital famous throughout the continent. This year the activities were a little even more interesting by the fact that the city is now at the height of its winter sports celebrations.

The value of the wheat crop of Saskatchewan was \$264,600,000 in 1923, or substantially more than half of the total Dominion value. A total of 18,000,741 acres were seeded which yielded an average of 18.5 bushels per acre, or a total of 240,561,000 bushels.

One of the most remarkable escapes from sudden death was witnessed at Aylmer, Quebec, when a chauffeur attempted to beat the train to the Aylmer Road Crossing and reached the tracks the very same moment a train was passing. The taxi driver and his two passengers were thrown from the car and were unable to speak on account of the shock and fright. They were otherwise uninjured.

David E. Brown, 71 years of age, and J. A. Fullerton, 81 years old, died at Vancouver, B.C. on the same day, February 10. They were two of the best known figures connected with the early history of Vancouver and the construction of the Canadian Pacific Railway. Brown was the first agent appointed by the company at Port Moody in 1886 while Fullerton served thirty years in Montreal with the old A.P. Line, going to Vancouver in 1888.

For the first time in the history of moving pictures, the Canadian timber wolf is to be filmed on his native haunts. Frank Boudreau, big game hunter and trapper, and Joseph J. Sartori, both of Brooklyn passed through Montreal recently on their way to Fabre near the Kipawa River and Lake Temiscaming where they intend to hunt, trap and film the timber wolves which are the scourge of the game of that country.

A little, gray-haired lady, nearly seventy years of age and totally blind, arrived from Swift Current at Winnipeg. Given into the care of Stationmaster Ruff of the Canadian Pacific Railway, to transfer to the outgoing train, she was made comfortable and assured that she would have no other changes to make. Mr. Ruff also ascertained that she was to be met by her son at Toronto and assured the feeble passenger that she would be looked after and every care given her. "If I had not had faith in you boys, I would not have taken the journey," came the tribute from her.

The Canadian Pacific Social and Athletic Club of Regina contributed \$75 to the League Post Christmas Cheer Fund. Of this sum \$25 was to the Old Poles' Home at Wolseley; \$25 to the Orange Orphanage at Indian Head; \$25 to the Salvation Army Girls' Home. On the first day of the Christmas School holidays Santa Claus arrived at the Regina Station on a C.P.R. train and distributed candy to 3,500 children who were also taken to various theatres. All this was arranged by officers of the Social Club.
